THE IMPORTANCE OF HAND HYGIENE

CHALLENGE

For years now, Hand Hygiene has been recognized as the most important tool in preventing the spread of healthcare-associated infections (HAI). Indeed, through compliant Hand Hygiene practices - cleaning hands at the right time and the right way - most HAI are preventable. Nevertheless, in 2019 studies are still showing evidence of poor compliance rate amongst Healthcare Workers (HCW), with an overall average of 38.7% with lower rates for Doctors than Nurses. Therefore, there is still a lot to achieve in order to prevent HAI from Hand Hygiene, and that is why Saniswiss is a member of the Private Organizations for Patient Safety (POPS), a program which was launched by WHO with one aim: promoting Hand Hygiene Guidelines to increase Patient Safety on a global scale. All around the world, Saniswiss increases awareness and shares WHO's recommendations and tools with its team of trained qualified professionals to better serve our customers and their patients' safety.

HOW TO ENSURE AN OPTIMAL HAND HYGIENE COMPLIANCE

SOLUTIONS

At Saniswiss, we believe that in regard to Hand Hygiene, IPC managers should never compromise on quality and always look for "tolerance for compliance". Indeed, we believe that in addition to the multi-modal strategy from WHO, the key to increase compliance in Hand Hygiene practices, and therefore reducing HAI, is to offer healthcare workers products which respects their skin, their health, and their environment. We offer a complete range of products safe for healthcare workers' health and environment which are all SAFE certified.

SANISWISS INNOVATION

Developed with healthcare workers for healthcare workers, the Sanipod encompasses WHO's multimodal approach to Hand Hygiene. Providing instant trainings with immediate feedbacks, it also alerts distinctively facility managers when the Sanipod is empty, to improve hand sanitizers availability drastically. Touchless, airless and with a safety cover, its large autonomy allows for up to 20'000 disinfections. With its one-of-a-kind organic design, it reflects the commitment for hand hygiene excellence from ambitious healthcare stakeholders.

SANISWISS SANIPOD | REF. 132184

TECHNICAL DATA	
SUITABILITY	Sanitizer Hands H1 Gel REF. 132151 
INSTALLATION	Easy to set up, wall-mounted installation or use with floor stand 
CAPACITY	800 mL reservoir pouch 
BATTERY LIFE	4 x standard size C batteries* 20'000 uses 
DIMENSIONS	280 L x 295.4 H x 159 D mm 

OUR UNIQUE SOLUTION IN A NEW FORMAT SANITIZER HANDS^{H1}

Formulated with bioethanol from organic origin. Efficient on most germs for hygienical as well as surgical disinfection. Good persistent activity after disinfection. Meet WHO recommendations on Hand Hygiene (POPS).

SECONDS SAVE LIVES

With the ambition of providing hand hygiene amongst healthcare workers at heart, we proudly introduced this year a brand-new way to dispense our best-in-class Sanitizer Hands H1 : the Sanipod. With its unique design, it brings several innovations for the improvement of touch-less Hand Hygiene compliance. Its smart backlight offers key visual insights for Healthcare workers such as the 6 movements of Hand Hygiene as for WHO's recommendations.

6 MOVEMENTS FOR A BETTER HAND HYGIENE COMPLIANCE

1. RUB HANDS PALM TO PALM

2. RIGHT PALM OVER LEFT DORSUM WITH INTERLACED FINGERS AND VICE VERSA

3. PALM TO PALM WITH INTERLACED FINGERS

4. BACKS OF FINGERS TO OPPOSING PALMS WITH FINGERS INTERLOCKED

5. ROTATIONAL RUBBING OF LEFT THUMB CLASPED IN RIGHT PALM

6. ROTATIONAL RUBBING, BACKWARDS AND FORWARDS WITH CLASPED FINGERS OF RIGHT HAND IN LEFT PALM AND VICE VERSA
